Forecast For The United Kingdom
Issued by Met Office Exeter
at 1400 on Thursday 08 Apr 2021

UK Outlook for Friday 23 Apr 2021 to Friday 7 May 2021:
Confidence remains low by the latter part of April and into early May. Most unsettled conditions are likely to affect northern and western parts of the UK with drier weather and more settled conditions expected for the south and east. Temperatures will probably remain around average during the end of April but with an increased chance of some warmer spells into early May.
